Peter P. Goché is a practicing architect, artist and educator. Using site-adjusted installations as primary mode of practice, Goché deploys an integrated approach to both theoretical and practical questions pertaining to the nature and impact of materiality specific to the re-occupation of post-industrial spaces. Goché has exhibited and lectured on his creative practice and scholarship at many conferences and cultural institutions throughout North America and Western Europe. As educator in the Department of Architecture at Iowa State University, he coordinates and teaches design studios and previously co-lead the ISU DoA 2014 & 2018 Venice Biennale workshops. Goché is also the founder of *Black Contemporary*, an experimental site dedicated to atmospheric drawing.

funding: \$7,000) Summary: Marwan Ghandour and Peter Goché, recipients of the AIA RFP Research Program, studied the mapping and analysis process of lowa conducted in correlation with lowa's different representations, complemented by the historical and political conditions that produced these representations. This proposal for spatial regeneration is based on negotiating the various representations in order to identify the conditions that can produce locally sustainable places and create reconciliation with the orthogonal, systematic subdivision of lowa created in the nineteenth century. Peter Goché presented the findings of this research at the 2008 AIA convention in Boston, MA.
