PLAYHOME -- POROSITY AND GRADATION FOR CHILDHOOD MEMORY

SITE: Damyang, Jeollanamdo, Korea
Client: Housing union in Kia motors
Module 1: ‘Memory of Childhood’ – Mom & Dad + young child(ren) / below 125 m²
Total building area: 115 m²

Simple description: Inspired by the slides, swings and toys those childhood memories, it is possible to create a space not only with those elements but also with gradation and porosity. Slide was translated as the circulation area connects child(ren) bedroom to the living room. The steel cable to hold the stairs was inspired by swings. Inspiration of lego is shown on the facade of porosity with gradate change.
