The undergraduate minor in Urban Studies is an interdisciplinary program that emphasizes urban life in a variety of settings and from different disciplinary and methodological approaches. The Urban Studies minor will allow students to explore varied and multiple dimensions of urban and community life through differing conceptual and analytical frameworks.

- Students can pursue interests in:
- urban history
 - urban design
 - neighborhood revitalization
 - economic development
 - social movements
 - global urbanization

The elective courses allow students to examine the interplay among different groups occupying urban space, the problems they confront, their struggles for recognition and power, and the forces shaping the physical terrain they inhabit. Electives may be chosen from among courses from the Colleges of Design, Agriculture and Life Sciences, Engineering, Human Sciences and Liberal Arts and Sciences

Students wishing to pursue this minor may elect to apply courses towards the minor that already form part of their degree.

Sustainability is often defined as "meeting the needs of today without compromising the ability of future generations to meet their own needs." The minor in sustainability at ISU is available to any student who wants to further learn about sustainability issues affecting humans today and in the future. Students are exposed to ideas and issues related to a sustainable, balanced and ethical future for the planet and its inhabitants. Issues pertain to the interplay between environmental, social and economic factors in improving the quality of human life, within the capacity of supporting ecosystems.

Students will consider the dynamics of biological population growth and decline in the natural world, predator-prey models, over-exploitation of natural resources, energy balances, and much more. Students also learn how human behavior affects the natural world and the ability of earth to sustain life. They will understand how the decisions they make as consumers, workers, resource owners, citizens and policymakers affect human welfare in this and future generations. Students also will be able to articulate why some environmental, social and economic profiles are sustainable and others are not.

The minor provides students knowledge sufficient to apply sustainable practices in their personal & professional lives.

The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture and the built environment. In lectures and focused seminars, students explore:

- historical and contemporary issues
- cultural production
- media and technology
- design in everyday life
- models of professional practice

Electives may be chosen from a range of eligible courses.

Students wishing to pursue this minor may elect to apply courses towards the minor that already form part of their degree.

The College of Design's undergraduate minor in Digital Media is intended to familiarize students with the use of digital media in the design process. This minor is open to all undergraduate students at Iowa State University. It covers the knowledge and techniques necessary to generate digital representations for a wide variety of disciplines.

Each year, a number of Architecture Electives are offered that can count towards the 300+ level credits in this minor. These include courses on an array of topics including advanced visual representation, digital fabrication, energy performance modeling, or preservation technology. Courses offered outside of Architecture are similarly varied, including those related to GIS, Digital Photography, Animation, Coding, Video Art, and Parametric modeling.

Because this is a multidisciplinary minor, with courses provided from all departments in the College of Design, some fundamental and elective courses may be limited to their respective majors or have limited or no space available to outside majors. Most courses have prerequisites, but some of those are also listed courses that are part of the minor.

+ MINOR (15 CH)

Preservation & Cultural Heritage

The College of Design's undergraduate Minor in Preservation & Cultural Heritage will be offered for the first time in Fall of 2021. The Minor provides students with knowledge, skills, and credentials that complement undergraduate degrees in a wide variety of majors, but especially Architecture, Interior Design, Community & Regional Planning, Landscape Architecture, and History.

- To these ends, the Minor has two major curricular objectives:
- Provide students with a holistic understanding of historic preservation, drawing from the various departments involved, yet allowing for the development of expertise within a student's specific major.
 - Provide a curriculum that conforms with the National Council for Preservation Education's pedagogical guidelines and the Federal Government's Professional Qualification Standards for historic preservation.

In addition to two required Architecture classes counting towards this minor, two Arch Electives taken under the "general elective category" (not counted as part of the required Arch classes), can also be applied as required classes:

Arch 567 Preservation, Restoration & Rehabilitation
Instructor: Arvid Osterberg

Arch 568 Historic Preservation
Instructor: Mikesch Muecke

Iowa State's entrepreneurship minor is an interdisciplinary curriculum that provides opportunities for students to learn about entrepreneurship – the process of creating value by recognizing and developing opportunities. The entrepreneurship minor serves to complement the student's major area of study in any college discipline at Iowa State.

Students in the entrepreneurship minor will develop skills and knowledge in the entrepreneurial process, business feasibility analysis, customer discovery, business planning, innovation, opportunity recognition, technology transfer, industry analysis, and startup strategy. Students will learn to develop an entrepreneurial mindset that applies to business creation or employment within an existing firm or organization.

The ISU Pappajohn Center for Entrepreneurship enhances the classroom experience by providing opportunities to collaborate with other entrepreneurial-minded students across campus, and offers a variety programs for the entrepreneurial-minded student. Students have the opportunity to pitch their ideas, receive feedback, and network with successful entrepreneurs. They may also participate in the Cystartups student accelerator.
